Article 1 General provisions and definitions

1. This regulation is a TER as referred to in Article 7.13 WHW.
    a. The provisions contained in these regulations are only legally valid if and insofar as they do not conflict with stipulations made in law or pursuant to Dutch law;
    b. The regulations are adopted by DAE's Executive Board with the consent of the BCC and in consultation with the Examination Board.
2. The scope of these regulations is restricted to students at DAE who fall under the jurisdiction of DAE's Executive Board.
    a. The Executive Board is responsible for regular assessment of the TER, for the purpose of monitoring and, where necessary, adjusting the study load. The Executive Board considers the time students are required to spend on the education as a result of the study load.
3. In accordance with Section 7.13 of the WHW, the TER is part of this Student Charter and is available on DAE's online platforms.
4. In this chapter, the following additional definitions apply:
    a. Programme of study: the full-time Bachelor degree programme in Design (B Design – CROHO 39111) offered by DAE;
    b. Propaedeutic phase: first phase of the programme of study, namely the first year of the Bachelor degree programme (60 EC), as referred to in Section 7.8 of the WHW. In this phase, undergraduate students gain an understanding of the substance of the programme and the intended profession. Selection and referral are possible at the end of this phase (Section 7.8(5) of the WHW). This phase concludes with the propaedeutic examination (Section 7.8(3) and (4) of the WHW);
    c. Main phase: The main phase comprises the second year, the third year, and the first semester of the fourth year of the Bachelor programme. This phase follows the propaedeutic phase of the Bachelor programme and comprises 150 EC.
    d. Examination phase: The examination phase is the period during which the course units Graduation 4B (final examination) and Reflections 4B are offered to the student. This phase comprises 30 EC.
5. The education, assessment and examination are conducted in English. The specific nature of the field of design and the background of the student body require this, in accordance with the Code of Conduct for the International Student adopted by DAE's Executive Board.

Article 2 Exemptions for Bachelor programme

Following consultation with the head of the Bachelor programme, the Examination Board is authorised to grant exemptions to students who have acquired certain skills through study or work experience before being admitted to DAE. These skills have present qualities equal to the learning outcomes and criteria at DAE.

Article 3 Structure of Bachelor programme

1. The education in the Bachelor programme consists of a propaedeutic phase and the main phase.
2. The Bachelor programme consists of a total of 240 EC: 60 EC for the propaedeutic phase, 150 for the main phase, and 30 for the final examination.
3. The Bachelor programme consists of the following units of learning:
    a. Essentials (10 EC) is the preparatory module in which students familiarise themselves with the various workshops and techniques available at DAE and the various Studios.
    b. Fundamentals (55 EC) is the core module in which students gather the fundamental knowledge, skills, insights and tools of design.
    c. Studios (60 EC) is the core module in which students are given the opportunity to discover different aspects, research and practices in design by choosing one of the several studios at DAE.

   d. Reflections (40 EC) is the continuous reflection module in which students are guided by a coach in peer groups to reflect on their studies, design practices, the field of design and their roles in society.
   e. Internship (25 EC) is the professionalisation module in which students gain experience with different working methods and disciplines in a professional environment.
   f. Focus (25 EC) is the advanced elective module that gives students the opportunity to elaborate or expand on their choice of materials, techniques and production.
   g. Graduation (25 EC) is the finalising module in which students are guided by several tutors during two design projects. Students are able to express the individual design profile they have developed during their time at DAE.

4. The qualifications and requirements to pass the propaedeutic phase are specified in Article 4.
5. The qualifications and requirements to pass the main phase are specified in Article 5.
6. The qualifications and requirements to pass the examination are specified in Article 7.

Article 4 Propaedeutic phase of Bachelor programme

1. The propaedeutic phase of the Bachelor programme consists of the course components: Fundamentals 1A, Fundamentals 1B, Studio 1B, Essentials 1A and Reflections 1A and 1B, which account for a total of 60 EC.
2. The qualifications to pass the propaedeutic phase consist of the learning outcomes of the course components mentioned in (1).
3. To pass the propaedeutic phase, the student must meet the standard for the propaedeutic phases as specified in the EC table in Annex I: they must attain 60 EC. Thus, the propaedeutic standard is as follows: all propaedeutic course components (Fundamentals 1A, Fundamentals 1B and Studio 1B) must have been assessed as ‘sufficient’, ‘good’ or, in the case of Essentials 1A and Reflections 1A and 1B, ‘yes’.
4. The propaedeutic standard requires the successful completion of at least 45 EC in the first year of study and at least 60 EC within two years of commencement of the programme.
5. At the end of the first year of enrolment, or for as long as the propaedeutic standard has not yet been met, the Executive Board issues each student a binding study advice regarding the student’s continuation within the programme of study.
6. If the propaedeutic standard referred to in (4) is not met, a negative binding study recommendation (BSA) will automatically be issued.
7. A student who passes the propaedeutic examination will receive a certificate from the Examination Board as proof thereof.
8. Propaedeutic students receive advice twice regarding the progress of their studies in relation to a negative binding study recommendation. The second recommendation may coincide with the study recommendation as referred to in Section 7.8b of the WHW. Students with a delay also receive advice at the start or change of their individual study scenario.
9. The Executive Board may attach a rejection to the negative binding study recommendation as referred to in the previous paragraph of this article. This happens if the student has not yet completed the propaedeutic phase within two years of starting the programme and is not deemed suitable for the programme based on the student’s study results. Before the Executive Board issues a rejection, the student is given a warning with a reasonable time limit to improve the student’s study results.
10. Students who have received a negative binding study recommendation that includes a rejection are no longer eligible to enrol at DAE in the same programme of study.

11. Where there are urgent reasons to do so, the Executive Board reserves the right to deviate from the recommendation given.
12. In special circumstances, the Examination Board may make different arrangements. At all times, the student must have reported special circumstances to the student counsellor as soon as possible after these circumstances become known to the student.
13. Students who are enrolled at more than one institute must meet the established standards and requirements with respect to the study progress, based on the number of credits the student has gained at DAE.
14. Students who disagree with the recommendation and/or the Executive Board's decision must submit a notice of objection by e-mail to loket@designacademy.nl within six weeks, in accordance with the provisions specified in Chapter 10 of the Student Charter. Only objections that raise points that were not known before the recommendation was issued will be considered.

Article 5 Main phase of Bachelor programme

1. The main phase of the Bachelor programme consists of Fundamentals 2A, 2B, 3A, Studio's 2A, 2B, 3A, Internship 3B, Focus 4A, Reflections 2A, 2B, 3A, 3B, and 4A, which account for 150 EC. An overview of the EC's is available each year and can be viewed in Annex I of the Student Charter.
2. Students take part in assessment for the course components listed in (1) in the order listed in the EC-table in Appendix 1. Individual study scenarios have been drawn up for the cohorts who started in 2021 or earlier; all students in these cohorts have been assigned scenarios in accordance with the applicable conversion.
3. Deviations from the standard order of course components of the programme of study are granted according to the existing scenarios provided in Appendix 2; any deviations from this standard order must take the form of an individual study scenario, which must be requested from the Examination Board.
4. The main phase is concluded once all course components referred to in (1) have been successfully completed.

Article 6 Assessments of Bachelor programme

1. Every course component is concluded by assessment. During assessment, the knowledge, skills and insights of the student are evaluated for the learning outcome of that specific course component.
2. Within the Bachelor programme, DAE works with learning outcomes, which the student must have demonstrated at the time of assessment of a specific unit of learning. Based on this evaluation of the learning outcomes, the assessment determines if a student passes that unit of learning.
3. The assessment is set up by the tutor or tutor team of each course component to match the learning outcomes and teaching activities. The tutor or tutor team is responsible for the assessing, grading and feedback during assessment. The coordinator of each course component is responsible for the logistics of organising the assessment within the frameworks of DAE policy.
4. To be assessed, one must be enrolled as a student.
5. Students are offered at least two opportunities per academic year to sit assessments for the course components in the propaedeutic, main and examination phase.
6. The first opportunity is the standard assessment, which takes place at the end of the course component. The second opportunity is called the 'redo' and takes place during the redo week which is a predetermined week in the Calendarium.
7. Students who do not attend an assessment opportunity are considered to have forfeited their opportunity for assessment. The assessment will be evaluated with a Not Present (NP).
8. All assessments and examinations of course components within the Bachelor programme are taken by the student individually, either in written or oral form

and/or by means of the presentation or exhibition of completed work, at DAE or at another location designated by DAE.

9. All assessments in the propaedeutic phase and main phase are evaluated on a scale of G, S, I, NP, Yes or No, which are awarded the following definitions:
   G = Good - passed
   S = Sufficient - passed
   I = Insufficient – not passed
   NP = Not present – not passed
   Yes = passed
   No = not passed
10. For the course components Fundamentals 1A, 1B, 2A and 2B, the final grade will be recorded as 'Good' if at least two-thirds of the individual components are assessed as 'Good'; otherwise, the grade will be 'Sufficient'. Specifically, for an assessment consisting of seven, four or two components, this requires a minimum of five, three or two 'Good' assessments respectively. The above applies only on the condition that the presence of a single 'I' (Insufficient) or 'NP' (Not Present) will result in an automatic fail for the final assessment.
11. It is not possible to compensate for a non-passing mark with passing marks for other course components.
12. In case of illness or absence during assessment, the student will notify the coordinator of the course component, by 9:30 on the day of assessment at the latest. The student will be awarded a NP for the missed opportunity. The student will take part in the next available opportunity for assessment.
13. The right to a redo is only applicable if:
    a. the standard assessment opportunity was not passed;
    b. the student was not present during standard assessment opportunity and received an NP, regardless of the reason.
14. If there are no more opportunities for assessment, the course component needs to be completed fully when the course component is next taught in the programme of study.
15. As a rule, oral evaluations and assessments are not open to the public; in exceptional cases, the Examination Board or the Committee of Examiners in question may decide to deviate from this rule. It is always prohibited to record assessments.
16. If a student either misses or fails both the first and second assessment opportunities, they can submit a request to the Examination Board for an additional (third) assessment opportunity (extra assessment) after receiving the results. This request must be submitted in writing within 10 working days of receiving the results.
17. An extra assessment opportunity is only granted in cases of exceptional personal circumstances, which must be supported by documentation and known to the student counsellor. The student counsellor can help the student with the request process and contact with the Examination Board.
18. When deciding on an extra assessment, additional conditions may be imposed, such as achieving a minimum percentage of completed assignments or meeting attendance requirements for the course.
19. The third assessment opportunity is offered twice per academic year and is included in the Calendarium.
20. The decision of the Examination Board is final and will be communicated to the student in writing.
21. The results of assessment are visible to the student via the OSIRIS student following system within 10 working days of the assessment taking place, and no later than the day before redo week as determined by the Calendarium.
22. The statutory validity of the successfully completed assessments is 10 years, calculated from the day on which the result in question was achieved. Students who start the programme later, or who resume their studies following an absence, are assigned an amended study programme by the Examination Board, taking into consideration the course components the student has already passed and the requirements of the current study programme.

23. Students with disabilities are offered the opportunity to sit evaluations and assessments in an adapted manner. Students who wish to claim eligibility for adaptations must submit a request in writing to the Examination Board, giving reasons. The Examination Board issues its decision within 6 weeks following receipt of the request, unless the request requires further investigation, in which case the student will be notified when clarification of the request is available.
24. Students who disagree with the decision(s) of the Examination Board and/or the Committee of Examiners can appeal to the Board of Appeals for the Exams (CoBEx), as referred to in Chapter 10 of the Student Charter. This request for an appeal must be submitted by e-mail to loket@designacademy.nl, in accordance with the provisions contained in Chapter 10 of the Student Charter.

Article 7 End qualifications of Bachelor programme

The end qualifications of the final examination of the Bachelor programme form the framework to assure the qualities of the graduates of DAE. The end qualifications are formulated in five categories, as follows.

1. Creation
    a. Creation: The student is able to initiate and sustain an creative design process in which conceptual approaches and material execution are closely intertwined to translate ideas into form through a deep understanding of medium, material, and techniques.
    b. Experimentation: The student is able to investigate both traditional and emerging technologies and methods, working with uncertainty and using making as a mode of thinking in which sensory experience and formal knowledge are inseparable.
    c. Curiosity: The student is able to continuously question their own methods, formal decisions, and outcomes not only individually, but through interaction with peers and the world.
2. Research
    a. Inquiry: The student is able to apply creative research as an iterative, generative and collective component of design processes, in which making, thinking, and critical inquiry are inseparable and mutually reinforcing.
    b. Documentation: The student is able articulate and document creative research trajectories in ways that make the relationship between process, decisions, and outcomes legible.
    c. Translation: The student is able to translate creative research methods and outcomes into materialized projects that communicate these to relevant audiences.
3. Reflection
    a. Reflection: The student is able to reflect critically on their own work, development, and process: not only from an individual standpoint, but through sustained exchange with peers, tutors, and the broader field.
    b. Perspective: The student is able to clarify and develop their perspective and position as a designer, building a continuously evolving, research-informed practice.
    c. Purpose: The student is able to reflect on their practice as part of larger social, cultural, and ecological system and allow this awareness to purposefully inform their creative and professional decisions.
4. Context
    a. Contextualisation: The student is able to critically situate their work within relevant theoretical, historical, and contemporary contexts and their societal, ethical, ecological, and political dimensions.
    b. Relationality: The student is able to engage with diverse social, cultural, and ecological systems by building relationships with different communities, knowledge systems and ways of knowing.

   c. Impact: The student is able to act as a catalyst for change through their practice and take responsibility for the consequences of their work and identifying where design can contribute to transitions towards more equitable, sustainable, and regenerative conditions.
5. Profession
   a. Positioning: The student is able to communicate and position their work clearly, developing a design practice and engaging it meaningfully with diverse audiences and stakeholders.
   b. Autonomy: The student is able to work with autonomy in a professional role, collaborative format, and working condition that matches their work and evolving identity of practice.
   c. Continuity: The student is able to sustain and develop a practice beyond the programme drawing on their knowledge, methods, and network to actively contribute to and continuously develop in the field.

P8/15

Article 8 Graduation phase of Bachelor programme

1. The Bachelor programme concludes with the graduation phase (30 EC). This includes the course components Graduation 4B (25 EC) and Reflections 4B (5 EC). This graduation phase ends with the final examination of the Bachelor programme.
2. The graduation phase of the Bachelor programme is completed when all assessments and the final examination of the Bachelor programme have been completed with sufficient scores, unless the Examination Board has determined that research is to be conducted with regard to the final examination.
3. Only students in the Bachelor programme who have gained 210 EC (60 EC in the propaedeutic phase and 150 EC in the main phase) can be admitted to the graduation phase, in which they are offered the opportunity to take the final examination. Students are required to register for and take the final examination at the first available opportunity once they have completed all the course components of the propaedeutic and main phases.
4. The start and end dates of the graduation phase are determined by the Executive Board after recommendation from the Examination Board. The week in which students will sit the final examination must be announced at least five months before the date of the exam. The exact date of the final examination must be announced at least one month before the date of the examination.
5. During the graduation phase, the student is required to be supervised by a tutor who acts as the main guiding tutor. In addition, the student may request additional supervision from another tutor within DAE, as described in the Manual of Graduation .
6. Participation in the midterm of course component Graduation 4B is a condition to be able to participate in the final examination.
7. The final examination assesses the Graduation 4B course component as a whole. During the graduation phase, during the scheduled hours and guidance hours, the candidate must inform the main guiding tutor of the progress of the candidate's studies and final projects. The Executive Board is authorised to exclude students from sitting the final examination if they do not comply with this requirement.
8. Students graduate with two separate graduation projects. Graduation projects consist of:
   a. the creation of a work and the execution of research that relates to the course components followed by the student;
   b. the production of the Deliverables of Graduation as described in the Manual of Graduation 4B.
9. Prior to the start of the semester, the student and the main guiding tutor must reach agreement on the plans for the graduation assignments.
10. The candidate is not permitted to enter into cooperation agreements or contracts with third parties for graduation projects without written permission from the Executive Board.

11. Only students with written permission from the Examination Board may deviate from the number of graduation projects.
12. Students who wish to complete one of the graduation projects in collaboration with one other candidate, and to use this project to graduate, must obtain written permission from the Examination Board. The Manual of Graduation 4B contains guidelines on this matter.
13. Candidates who stop working on the Graduation 4B course component before it is completed must, at the first available opportunity, restart the component with two new graduation projects.
14. The assessment of the graduation projects is performed by the Committee of Examiners.
    a. The chair of the Committee of Examiners is authorised to require candidates to explain their graduation projects during the examination, for no longer than half an hour.
    b. When assessing the results of the graduation projects, the Committee of Examiners assesses alignment with the learning outcomes.
    c. A valid assessment of the projects is only possible if the portfolio and processlog are available to the Committee of Examiners.
    d. Each project is assessed by means of feedback and a mark per project. Only entire marks are to be given for individual projects. If a project is assessed with grade 5 or lower, a redo of that project will follow. If one or two projects are to be redone, the examination is not passed, and no final mark is calculated. When both projects have been passed (assessed with a grade 6,0 or higher) a final assessment follows in the form of a single mark for the final examination, being the average of scores for both projects. This total average may contain half marks. The final examination is passed when this average is at least a 6,0.
    e. For each graduation project, the assessment is documented on an assessment form. The assessment form includes:
        - the evaluation of the assessed learning outcomes expressed in feedback on the learning outcomes;
        - a project mark in whole marks;
        - the total average of the final examination (the grade between 1 and 10 that is the average of the two projects; half marks are allowed for the final mark);
        - in case of a redo, the form includes the description of the redo assignment based on feedback that describes improvements to be made with regards to the learning outcomes.
    f. The assessment per project, and the final assessment of Graduation 4B, are thus expressed on a scale of 1 to 10. The numbers have the following meanings:

1 = poor	6 = sufficient
2 = very weak	7 = more than sufficient
3 = weak	8 = good
4 = very insufficient	9 = very good
5 = insufficient	10 = excellent

15. The DAE degree certificate is awarded if the final mark for Graduation 4B is at least 6,0 and if the candidate has successfully completed all other course components of the Bachelor programme (see Appendix 1).
16. Whether or not a candidate has passed is confirmed by meeting of the Committee of Examiners. The candidate is informed of the result as soon as possible following the meeting.

17. From the time of the assessment until the moment of deregistration, the candidate can view the assessment for Graduation 4B in the student monitoring system. The candidate's transcript of records and diploma supplement are awarded together with the degree certificate.
18. The degree certificate, the transcript of records and the diploma supplement are signed by the chair of the Examination Board.
19. The awarding of the designation of 'cum laude' is determined by the cum-laude committee, consisting of the Studio Leaders and the Creative Director. The committee has the deciding right to award the designation or not. The committee can award the designation only if:
    a. both of the projects were awarded at least an 8.0 by the Committee of Examiners; and
    b. the total duration of the study path of the student in the Bachelor programme does not exceed the nominal period of study of four years with more than one year. In cases in which a longer duration of study resulted from circumstances outside the power of the student, the cum laude committee can make an exception.
20. Candidates who fail to meet the requirements set out in 8.16 will be given the opportunity to sit the final examination again. The Committee of Examiners will provide feedback intended to help the candidate prepare for the redo.
    a. Candidates must redo the examination at the first available opportunity, as determined by the Examination Board.
    b. Candidates who still do not meet the standards set out in 8.16 after the redo must restart the Graduation 4B course component and participate in the next examination for that component with two new graduation projects.
    c. The chair of the Examination Board approves the redo schedule. Redos are organised in the same academic year, according to the calendar.
    d. The provisions contained in Article 7 also apply to the redo. Candidates must present both projects and the portfolio at the redo.
21. The right to a redo applies exclusively in the following cases:
    a. the result of the regular assessment moment is an Insufficient;
    b. the student was not present at the regular assessment moment .
22. The same provisions apply at redo, as those applicable to the final examination in this article.
23. If, with regard to the provisions of this article or with regard to fraud (see Student Charter 2.7.2.e), a candidate for graduation has, in the opinion of the board of examiners, been guilty of any cheating (or fraud) or has acted contrary to the regulations in any other respect, and this is discovered before or during the examination, the chairman of the Examination Board will deny the examinee participation or further participation in the examination, after the chairman of the Examination Board has heard the examinee in question on this matter.
    a. If irregularities are only discovered after the examination, the chair of the Examination Board will withhold the candidate's degree certificate.
    b. If the chair of the Examination Board applies the procedure set out in (24), the chair immediately sends to the examinee by registered post the provisions contained in the paragraph in question.
    c. In all cases not covered by these Teaching and Examination Regulations, the Executive Board will decide. The Executive Board will communicate its decision as soon as possible to the chair of the Examination Board, the members of the Committee of Examiners and the external examiner(s).
24. DAE has an obligation to retain information with regard to the graduation projects of students.
    a. The Executive Board ensures that a copy of the description of the graduation projects and examination requirements is stored in DAE's archives for seven years.

P10/15

b. The Executive Board ensures that the assessment of each candidate's graduation projects, and the result of each candidate's examination are stored in DAE archives for
c. ten years.

25. Students with disabilities will be offered the opportunity to sit the examination in an adapted manner. Students who wish to claim eligibility for adaptations must submit a well-founded request, in writing and in a timely manner, to the Examination Board. The Examination Board issues its decision within six weeks following receipt of the request, unless the request requires further investigation, in which case the student will be notified when clarification of the request is available. P11/15
26. Persons who have passed the final examination that is linked to the programme of study of the Bachelor programme are entitled to use the title of 'Bachelor of Arts'.
27. Before the end of the first month following the month in which a student, as referred to in Section 9.5(5) of the WSF2000, passes the final examination, the Executive Board informs the Education Executive Agency (DUO) of this and sends a message to the student in question.
28. Students who pass the final examination will receive a degree certificate, diploma supplement and a transcript of records from the Examination Board.
29. If a candidate is found not to have been correctly enrolled in any year but that candidate has nevertheless benefited from education or sat assessments, the Executive Board may determine that the degree certificate can only be awarded once the relevant tuition fee has been paid. The Examination Board will not extend a degree certificate before the Executive Board has declared that it is to be awarded.
30. Students who do not pass the final examination or who have stopped their study before the final examination can request a transcript of records of their results from the student administration.
31. Students who disagree with the decision(s) of the Examination Board and/or the Committee of Examiners can appeal to the Board of Appeals for the Exams (CoBEx), as referred to in Chapter 11. This request for an appeal must be submitted by e-mail to loket@designacademy.nl, in accordance with the provisions contained in Chapter 11.

Article 9 Concluding provisions

1. Amendments to these regulations are adopted separately by the Executive Board.
2. No amendments will be made during the ongoing study year unless those amendments are to the students' advantage.
3. The current revision enters into force on 1 September 2026. These regulations were adopted by the decision of the Executive Board of DAE, dated 01-08-2026, with the consent of the IPC and the BCC and following consultation with the Examination Board.

APPENDIX 1 BACHELOR CREDIT TABLE 2026-2027

YEAR 1 – Propaedeutic phase					
Semester 1		Semester 2		1 study year	
Fundamentals 1A*	15EC	Fundamentals 1B*	15EC		
Essentials 1A	10EC	Studio 1B	10EC		
Reflections 1A	5EC	Reflections 1B	5EC		
Total semester 1	30EC	*Total semester 2*	30EC	*Total Propaedeutic phase*	60EC

YEAR 2 – Main phase					
Semester 1		Semester 2		1 study year	
Fundamentals 2A*	10EC	Fundamentals 2B*	10EC		
Studio 2A	15EC	Studio 2B	15EC		
Reflections 2A	5EC	Reflections 2B	5EC		
Total semester 1	30EC	*Total semester 2*	30EC	*Total Main phase*	60EC

YEAR 3 – Main phase					
Semester 1		Semester 2		1 study year	
Fundamentals 3A*	5EC	Internship 3B	25EC		
Studio 3A	20EC				
Reflections 3A	5EC	Reflections 3B	5EC		
Total semester 1	30EC	*Total semester 2*	30EC	*Total Main phase*	60EC

YEAR 4 – Main phase					
Semester 1		Semester 2		1 study year	
Focus 4A	25EC	Graduation 4B	25EC		
Reflections 4A	5EC	Reflections 4B	5EC		
Total semester 1	30EC	*Total semester 2*	30EC	*Total Main phase*	60EC

Total Bachelor programme
240EC

*The educational unit of Fundamentals includes the lines of Design Studies, Production Studies and Contextual Studies. EC's are only awarded for Fundamentals as a whole, not for the individual lines. Fundamentals is thus passed or not as a whole.

APPENDIX 2 STUDY SCENARIOS BACHELOR

FIXED STUDY SCENARIO'S IN CASE OF SEMESTER FAILED / STILL OPEN: AFTER REDO'S

this applies to year 1 only in case the total amount of ECTS credits at the end of the propaedeutic year is between 45-59EC
this applies to failed Studio's year 2-4 and/or Fundamentals year 2 and/or combinations worth ≥ 10EC
this applies not in case only Reflections (5EC) ór only Fundamentals 3A (5EC) are failed/still open
for passed parts of the study program exemptions apply
other scenario's only in case of personal circumstances and with approval of the examination board > contact your student counsellor

YEAR 1

SCENARIO FAIL 1A

semester 1	semester 2
1A fail	1B
do 1A	2B
2A	3B Internship
3A	4A only Free Focus
